

I am a listener of KLOVE radio on FM 89.7 in the Layton, UT/Hill AFB area. Recently Klove informed me that the FCC may give LPFM broadcast service priority over FM translators. I receive Klove radio from a translator and I don't want to loose my signal.

Klove plays a vital role in my community by broadcasting encouraging music that is family friendly. This service is vital to my family and me, and any LPFM station that takes priority over the Klove translator will probably not provide the same level of service.

In the age of radio programs from the likes of Howard Stern and Bob & Tom where faith and reverence of God and respect of individuals is mocked on a daily basis, taking my Klove radio off the air by giving LPFM priority will only drive a stake in the heart of the last vestige of decency in the local radio market.

Sincerely,

SMSgt Mark Kovalcik
